**June, 2019****Specification Change Notice:****VM2010 Air Pen Marking Machine**

Dear customers,

Thank you for using our products. This “Specification Change Notice” announces the change of CPU board and power supply unit of VM2010 Air Pen Marking due to discontinuation.

Differences between old VM2010 and new VM2010 (manufactured after August 2019) are as follows:

**(1) CPU board**

	<b>Old model</b>	<b>New model</b>
Product serial of VM2010	90130000 or smaller	90130001 or larger
Model No.	PRE100007	PRE100074
Battery	VM7869 Backup Battery	Button Battery (CR2450)
Special font data	Vector burns special font data to UV-EEPROM in our factory.	Users can register special font data to the flash memory via USB interface.

\*1 Check the product serial below 7-segment display of VM2012 Control Unit.

\*2 UV-EEPROM for old VM2010 is not available in new VM2010. To use the special font in new VM2010, a CD-ROM containing special font data is necessary. For detail information, please contact our sales department.

**(2) Power supply unit**

	<b>Old model</b>	<b>New model</b>
Product serial of VM2010	90130000 or smaller	90130001 or larger
Mounting in VM2010	Attached without adapters.	Attached with an adapter.
Wiring	The number of connector pin is different. When attaching the new power supply unit to the CPU board, use new wiring cables supporting the new unit together.	

If above parts are damaged, it will be replaced by “New model” parts for repair.

Both package components and external dimensions of new VM2010 are not changed from old VM2010 at all. Also, external control methods and functions of new VM2010 are fully compatible with old VM2010. The marking data (program) created by MU2010-007 Control Software is available for both old VM2010 and new VM2010.

For questions, please feel free to contact our sales department.

Best regards,

Vector Co., Ltd.  
Sales department.
